Quality assurance

The aim of our developments is that our company continuously meet customer market expectations and orders by means of advanced mechanical technology.

By common operation of laser cutting equipment and existing machines, our company realised a well-prepared, modern sheet metal work centre which is suitable for fulfilment of complex orders, therefore its market position and efficiency is increased.

Kor-Product Ltd, besides technological developments, pays extra attention for meeting the ISO 9001:2008 quality assurance standards and ISO 14001:2004 environmental management system belonging to market expectations.

Our quality policy states that Kor-Product Ltd is committed in fulfilment of customers' expectations and demands that is it performs for absolute satisfaction of customer considering to observing of deadline and other requirements. It can be realised so that we provide continuous quality control and rely upon quality awareness, competence and love of profession of our colleagues to keep and improve the quality. Our competitive advantage on market appears in quick and quality manufacturing, delivery and field of specialities. We are committed to save that our partners must be satisfied with our products and services in the future too.
